Woodworking Machinery Manufacturers of America

Woodworking Machinery Industry Association
The Woodworking Machinery Industry Association (WMIA) and the Wood Machinery Manufacturers of America (WMMA) represent different segments of the industry and were established a number of years apart, WMIA in 1977 and WMMA in 1899. But for the last 30 years, the associations have been working together as well as individually for the industry ... your industry! That’s right, they have been connecting the Industry for over 30 years!

A number of years ago, WMMA and WMIA came together to form the Woodworking Industry Conference (WIC) — the “One Industry Conference” that you cannot afford to miss! Attending this “one conference” will give you a wealth of knowledge, practical information and valuable contacts for your company — an unmatched value for your business.

Why do industry professionals attend WIC year after year?
- Connect with your peers at a wide array of formal and informal networking functions.
- Contact Table Program – spend quality on-on-one time and build important business relationships.

ATTIRE
For WIC events, comfortable and casual dress is appropriate. Daytime attire is casual and sportswear is customary. All evening activities are informal as well. Wednesday’s beach activities may require sneakers or tennis shoes. Thursday’s offsite social event is an indoor/outdoor venue. Heels are not recommended.

WIC CHILDREN POLICY
All children MUST be registered to receive a badge. Registered children (ages 12 to 18) accompanied by an adult are welcome to the evening events. Please make alternate arrangements for children under the age of 12.

First Insurance Agency, Inc. has been in business for over 90 years. We insure a broad spectrum to include municipalities, government agencies, large contractors and manufacturers. Several clients have been with us for over 40 years. We offer a consultative, professional approach, where service is an ongoing process and part of our culture.

VISIT US ON THE WEB! www.1stinsurance.com
Stiles has been helping manufacturers achieve high performance with quality machines and service since 1965. Today, a wide range of industries partner with Stiles. We bring innovative concepts, new technologies and outstanding service to aerospace, transportation, alternative energy, architecture and structural elements, furniture, retail fixtures and other industries. We offer expertise in manufacturing within a range of materials, including wood, plastics, composites, carbon fiber, glass, stone and nonferrous metals. We can help you test and implement new techniques that will revolutionize your business and your industry. Regardless of the changes in technology, the emergence of new materials, or fluctuations in the national and global economy, we’re here to stay, and to stay behind you every step of the way. We’re proud to have played a part in the success of thousands of businesses just like yours. For large production manufacturers or small shops, our Total Production Solutions approach to manufacturing covers consulting and equipment integration, education, service, parts and so much more. We are your single source for the tools and the knowledge you need to stay ahead of your competition. The way we see it, our business is helping your business succeed.

Facebook: www.facebook.com/woodworkingnetwork

For more than 100 years, Woodworking Network continues to deliver the latest news, trends and supplies related to the manufacturing of cabinets, case goods, furniture and wood products. We produce a monthly publication, daily newsletters, face-to-face events, webcasts, videos and the industry’s favorite website. Our annual Woodworking Almanac and Red Book Resource Guide are the most read publications in the industry.

BUSINESS TRENDS FOR THE NEXT TWO YEARS
BY GENE MARKS

Gene Marks is a columnist, author, and small business owner. Gene writes every day on business, politics and public policy for the Washington Post and weekly for Forbes, Inc. Magazine, Entrepreneur and the Huffington Post. Gene has written 5 books on business management, specifically geared towards small and medium sized companies. His most recent is The Manufacturer’s Book of Lists. Nationally, Gene appears on Fox News, MSNBC and CNBC discussing matters affecting the business community. Through his keynotes and breakout sessions, Gene helps business owners, executives and managers understand the political, economic and technological trends that will affect their companies so they can make profitable decisions. Gene owns and operates the Marks Group PC, a highly successful ten-person firm that provides technology and consulting services to small and medium sized businesses. Prior to starting the Marks Group PC Gene, a Certified Public Accountant, spent nine years in the entrepreneurial services arm of the international consulting firm KPMG in Philadelphia where he was a Senior Manager.
PAUL EVANS

Paul Evans, Director Production & Simulation Technologies Department, Southwest Research Institute. Mr. Evans directs the Production and Simulation Technologies Department. Areas of specialization within the department include process improvement, lean manufacturing, six sigma, quality systems, innovation tools, workforce training, instructional design, training technologies and systems, simulators, electromechanical systems, robotics, controls, machine vision and optical sensing, image processing, machine perception, computer modeling and simulation, automated surface processing, structural and thermal analysis, technology feasibility studies, and third party analysis and review of electromechanical systems.

The Production and Simulation Technologies Department hosts the South Central regional office of the Texas Manufacturing Assistance Center (TMAC), an affiliate of the Manufacturing Extension Partnership to provide affordable technical assistance to Texas manufacturers. TMAC primarily works with small and medium manufacturers with the adoption and implantation of systems, processes, tools, technologies and a variety of other resources. Mr. Evans serves as a member of the TMAC Executive Council.

Mr. Evans’ areas of technical expertise include mechanical system design, software design, programming, industrial and custom robotics, and project management. During his tenure at Southwest Research Institute® (SwRI®), Mr. Evans managed a large ongoing multidisciplinary program for a food manufacturing company. This program required support from the Chemistry and Mechanical Engineering Divisions. The focus of this program was to enhance the customer’s productivity through strategic identification and implantation of automation solutions, development of long term next generation manufacturing processes, and assistance with various technical issues. Mr. Evans has a B.S., Engineering (Mechanical Emphasis) from Walla Walla College and M.S., Mechanical Engineering from Iowa State University.

NANCY FISTER

Nancy Fister is the Education Director for the Association of Woodworking & Furnishings Suppliers (AWFS®). She plans and coordinates the College of Woodworking Knowledge (CWWK®), the educational seminar program of the biennial AWFS Fair®. She also leads efforts aimed at increasing student and educator awareness of and interest in wood products manufacturing as a viable career path, and of garnering support of Career Technical Education (CTE) from legislators. Nancy is the staff liaison for the AWFS Education, CWWK and Public Policy committees.

FRED RASCOE

Fred Rascoe is Director of Career Readiness for Motlow College. He has over 30 years of experience in mechatronic product and process development. Fred has worked for IBM, Yorozu, and International Safety Instruments as Director of Engineering developing products for commercial use. He obtained his bachelor’s degree in mechanical engineering from UT Knoxville, and a Master’s Degree in Engineering from the University of North Carolina Charlotte. He also holds a Professional Engineering License in Tennessee.

Fred currently oversees the development and instruction of the Mechatronics program for both a certificate in Mechatronics as well as an AAS degree in Mechatronic Technology. Under his direction Motlow has successfully implemented a program of mechatronic study with two high schools, Oakland High School in Murfreesboro and Warren County High School in McMinnville. Also Fred has worked with MTSU to create an articulation agreement between MTSU and MSCC in mechatronics engineering. Some of his extracurricular work is being a member of the Governor’s skill panel on Advanced Manufacturing. He has been with Motlow State Community College for 5 years.
AWARDS PRESENTATIONS

WMMA BALDWIN AWARD
WMMA members agree that the prestigious Baldwin Award is an honor of a lifetime. Named for Ralph B. Baldwin, longtime member, the award will be presented to an individual in the woodworking industry who has exemplified the kind of commitment which makes an association function at, or near, its peak potential and is a contributor to his company’s success and the community of which he/she is a part.

WMIA WOODEN GLOBE AWARD & PARTNER OF THE YEAR AWARD
Every year WMIA honors excellence among woodworking companies by presenting the annual Wood Globe Awards. WMIA members nominate their customers, and awards are presented in three categories: Innovator, Educator, and Commitment to Excellence through Technology. In addition, distributor members present the Partner of the Year award to a woodworking machinery supplier who best exemplifies the spirit of partnership.

THE MANUFACTURERS EXECUTIVE PANEL

Sponsored by

FDMC

FDMC is the Woodworking Industry’s Strongest Media Brand. Embracing the technological evolution that is shaping the media business in the 21st century, CCI Media brings depth of experience and strength of commitment to the woodworking industry like no other media company. It’s redesigned, print brand leads the market in ad pages, staff written content, and insightful commentary by industry thought leaders. FDMC’s audience development team worked diligently throughout the financial crisis to track the changing landscape of the market, and create the most precise, up-to-date database in the industry. FDMC’s digital edition was the first in the industry to incorporate video into every issue, providing readers with content that comes to life every month. And, it is the only brand with apps for the iPad, iPhone, Google Play, and Kindle Fire. FDMC’s core print/digital product is enhanced by a team of innovative media brands including a robust, new website; www.fdmcdigital.com, The Daily Brief and the TipSheet e-newsletters, and the industry’s newest trade show and conference, Wood Pro Expo.

Innovation, commitment and dedication are the hallmarks of FDMC and the core reason that nearly half of the ad pages run to the industry are carried by the brand.
THE MANUFACTURERS EXECUTIVE PANEL
MODERATED BY TIM FIXMER

TODD F. BACHELDER
Todd Bachelder joined Menck USA in March of 2013 to launch Menck Windows with Bodo Liesenfeld of Liesenfeld International and joint venture partner Menck Fenster of Hamburg, Germany. After nearly 20 years in commercial banking, Todd has held positions as CFO and COO of two manufacturing companies and has provided financial, organizational and strategic consulting assistance to both companies and nonprofit organizations. Most recently, he was COO of custom wood window manufacturer, Duratherm Windows. Todd holds an A.B. degree in Economics from Dartmouth College and an M.B.A. degree from Amos Tuck School of Business Administration.

DAVE LOWES
Dave Lowes is Project Manager and Maintenance Department Manager at Havco Wood Products. Lowes has been with Havco Wood Products since 1991 and directly oversees the Maintenance efforts at their Cape Girardeau, Missouri facility as well serving as the Project Manager for Capital Projects at Cape Girardeau and for their plant in Vonore, Tennessee.

Beginning in 1999 Lowes led a team in designing and constructing a new 165,000 manufacturing facility in Cape Girardeau, Missouri. During this time he served as the project manager for the construction of the building as well as the machinery installation for the new multi-line plant. Lowes was also responsible for all environmental permitting necessary to bring the project within compliance with the Missouri Department of Natural Resources. Lowes has also participated in numerous other projects at both locations. Beginning in 2006, Lowes along with the management of Havco began the research and justification for converting one of the production lines to a semi-automated Scanning and Defecting process. Lowes is responsible for all Environmental permitting pertaining to Air Emissions and Storm Water regulations. In 2007 Lowes was responsible for spearheading the effort to implement a TPR [Total Productive Reliability] program at Havco.

Lowes is a member of the NFPA and is responsible for all compliance issues related to fire protection. Lowes received his B.S. in Business from Southeast Missouri State University.

JEFF STONE
Jeff Stone is the founder and CEO of Navy Island Inc., a manufacturer of acoustical panels, wood veneer panels, and architectural doors and frames based in West St. Paul, MN. Jeff started the company in 1983 making furniture in the family garage with his two brothers. For the next 12 years, the company tried it’s hand at various wood working related ventures before finally settling on manufacturing custom veneer panels in 1995.

In 2010 Jeff acquired Summit Door, a manufacturer of architectural doors and frames in St. Paul and transitioned it into Navy Island. In 2013 Navy Island expanded into manufacturing acoustical wall and ceiling panels and currently has a patent pending on the world’s most acoustically absorbent architectural panel. Navy Island currently has two facilities totaling 86,000 sq. ft. and employs 75 humans and 10 robots.

Jeff’s primary role is overseeing the company but much of his time is spent on research and development of new products. Their latest acoustic panel is currently on track to more than double company wide sales for 2015. Jeff and his wife have four kids and like to travel. When he is not trying to figure out how to make more wood products in less time, he spends his time golfing, sail-boarding and biking.

LOUIS TOBIA, JR.
Louis Tobia, Jr., of New England Casket Company, is the third generation owner and has been with the company full time since 1990. New England Casket has been manufacturing hardwood caskets for over 78 years. Lou has a business degree from Bentley University and has been a previous board member and President of CFSA completing his term in 2014. He was elected as Treasurer in 2011 and Vice President in 2012. He and his wife Melissa live in Middleton, Massachusetts, with their two children, Olivia and Andrew.”
CONTACT TABLES

The Woodworking Industry Conference offers the industry’s only contact table program, the most cost-efficient opportunity for face-to-face business meetings. This is a unique experience for the industry to convene for vital business discussions. WIC’s Contact Table Program is truly the most cost-effective sales call you will make in 2015! COCKTAIL RECEPTION AND DINNER AT SOUTHWEST SCHOOL OF ARTS

Sponsored by

Hendrick has been the innovator in panel processing solutions for over 60 years. Headquartered in Salem, Massachusetts, Hendrick remains an American manufacturer with a production facility for our smaller format panel saw series, as well as custom machinery engineering and fabrication. Our broad line includes vertical panel saws, horizontal panel saws, cross-cut saws, CNC routers, software and tooling.

WOODSHOP NEWS is the leading trade journal for professional woodworkers, with over 43,000 monthly subscribers receiving over 53,000 monthly editions (print + digital). We are the only Professional Woodworking magazine 100% dedicated to small and mid-sized woodworking shops. Our robust editorial content is centered on quality, craftsmanship and custom woodworking.
ECONOMIC OUTLOOK
BY BRIAN BEAULIEU, ITR

One of the country's most informed economists, Brian Beaulieu has served as CEO of ITR Economics™ since 1987 where he researches the use of business cycle analysis and economic forecasts to increase profitability. Brian has been providing workshops and economic analysis seminars in 7 countries to thousands of business owners and executives for the last 28 years.

Brian has been providing workshops and economic analysis seminars in 7 countries to literally thousands of business owners and executives for the last 31 years. During that period he has also been consulting with companies who need a domestic and global perspective on how to forecast, plan, and increase their profits based on business cycle trend analysis.

He is co-author of Prosperity in the Age of Decline, a powerful look at how to make the most of the US and global trends over the next 20 years. Brian also co-authored Make Your Move, a practical and insightful guide on increasing profits through business cycle changes, and noted by one reviewer as “simple, yet awesome.”

He is on the Board of Directors of the Ariens Company, a global leading manufacturer of outdoor power equipment, and a member of the Investment Committee for NorthStar Financial Services, CLS Investments in Omaha, Nebr. Brian is also Chief Economist for Vistage International, a global organization of CEOs comprising over 16,000 members.

Brian’s views have appeared in/on: the Wall Street Journal, New York Times, Barron’s, USA Today, CNBC TV, FOX Business TV, Knight Ridder News Services, Reuters, CBS Radio, The Washington Times, Forbes, Atlanta Journal Constitution, KERA TV, Canadian TV, and numerous other outlets. He is a regular columnist and contributing economist to national trade associations and publication.
Biesse, a leading manufacturer of machinery and automated systems for processing wood, plastics and non-ferrous metals, is known for some of the most innovative technology available in the industry. From affordable, high quality entry-level machines up to the most technologically advanced solutions available for panel processing, solid wood manufacturing, plastic manufacturing as well as the production of composite materials, we have the machinery to meet your needs. We understand from experience the challenges that face growing companies and we are dedicated to helping each of our customers excel. We continually chart new ground, bringing unprecedented levels of efficiency to the production process. We offer a maximum return on investment with affordable, flexible and user-friendly machinery designed to deliver exceptional performance. With trends and technology changing rapidly, high technology in your shop can give you the edge over your competition.

Edward Jones Investments: Fiesta Battle of the Flowers Parade
For 123 years, thousands of spectators have lined the streets in downtown San Antonio to witness the spectacular Battle of Flowers® Parade. Glittering in the Texas sunshine, the parade moves down the route thrilling the crowds with awe-inspiring sights and sounds. In 2015 the time-honored tradition continues with “This Land is Your Land,” highlighting our beautiful country and our American heritage. The first Battle of Flowers® Parade was held in 1891 to honor the fallen heroes of the Alamo and to commemorate the victory at the Battle of San Jacinto which gained Texas independence from Mexico. The tradition of honoring those heroes continues with the presentation of floral tributes as each entry passes the Alamo. The Battle of Flowers® Parade is the founding event of Fiesta® and the only parade in the United States produced by an organization made up entirely of women, all of whom are volunteers. The Battle of Flowers® Association supports the historic, educational, artistic and philanthropic achievements of the San Antonio community.

Safety Speed Manufacturing Company, Inc. “American Made Vertical Panel Saws, Panel Routers, Edgebanders, Screw Pocket Machines and Widebelt Sanders” All of these American made machines are built with a commitment to quality and durability representing a great value to the customer. Safety Speed Mfg. manufactures a combination of nineteen different panel saws, panel routers, saw/router combinations, wide belt sanders, edgebanders, and screw pocket machines which gives customers the ability to match the many features and price points exactly to their individual needs.

Williams & Hussey has been producing high quality molders to the woodworking industry for over 60 years. These versatile molders offer straight, curved and elliptical molding applications to the professional woodworker. We manufacture in-stock and custom knives made with the finest material and with guaranteed accurate grinding.

Original Saw has been manufacturing sawing equipment in its Northern Iowa facility for over 25 years. We currently manufacture electric arbor motors, radial arm saws, metal cutting radial arms, horizontal beam saws, material handling extension tables, manual measuring systems, DC drive systems, and miter saw stands. All of our equipment is manufactured in the USA by our skilled employees that make up the Original Saw team.
Founded in 1952 in Rimini, Italy, SCM Group S.p.A is the leading designer, manufacturer and distributor of innovative and technologically advanced solutions for woodworking, glass, stone, plastic, metals and composite materials. SCM Group’s line of products range from the “Classic” entry-level manual equipment to the turnkey fully-automated “Industrial” solution, and all products use the best Italian components possessing the renowned “Made in Italy” high level of quality and control. With headquarters in Rimini, SCM Group operates through 18 production facilities located throughout Italy and 19 foreign subsidiaries with a total workforce of 3,100 employees. Using an extensive distribution network, SCM Group exports over 80% of its production, covering 120 countries through subsidiaries, distributors and agents.

Alphacam is intelligent and intuitive CAD CAM Software for Woodworking, Metal & Stone Cutting. The emphasis behind the development of Alphacam is to provide our customers with productivity, reliability, and flexibility. This can be found in all our modules which include Routing, Milling, Turning with 2-Axis to 5-Axis Machining.
